

*"These guys manage a masterful combination of that thrashing death sound with a few progressive OSDM leanings."*

- Trevor Strnad, The Obituarist, Metal Injection 2016

Boston-based Bacterial Husk formed in 2015 with the intent of releasing unique Death Metal heavily influenced by acts like Gorguts, Carcass, Death and Malevolent Creation. Members' past and present projects include Boston heavy hitters Razormaze, Sexcrement, and Cadaverlyne.

In 2016 Bacterial Husk released their debut EP *Agnosia of Omens* to positive reviews. In 2016 and 2017 the band shared the stage with Funebrarum, Come to Grief, Gorguts, Entombed A.D. and Artificial Brain.

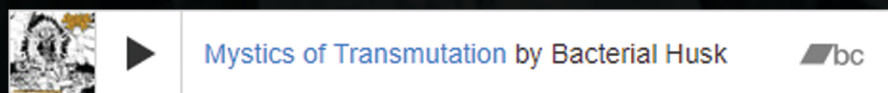

2018 marks a new chapter for Bacterial Husk. In April, they released the demo "Mystics of Transmutation" while finishing writing for their debut full length to be recorded and released later in the year.

Bacterial Husk is actively booking shows and seeking tour / festival opportunities.
